

Dragin Pump Kit

BLOVACTM
efficient and safe air products

The Blovac Dragin Pump Kit has been designed to recover liquids from machine tools, sumps, open pits, etc into a standard closed-head drum.

Powered by compressed air to generate a vacuum in the drum, The Dragin Pump is fast, efficient and safe way to remove coolants, used oils, solvents, sludge, hydraulic oil, metal chips and other industrial wastes.

Please note: Drum is not included

To ensure safe operation, The Dragin Pump incorporates an automatic shut-off valve which operates when the drum is full. The Dragin Pump has no moving parts, and does not come in contact with the material being recovered, providing long life and low maintenance.

Screw the Dragin Pump and the suction hose into the drum; connect the air supply and you're away.

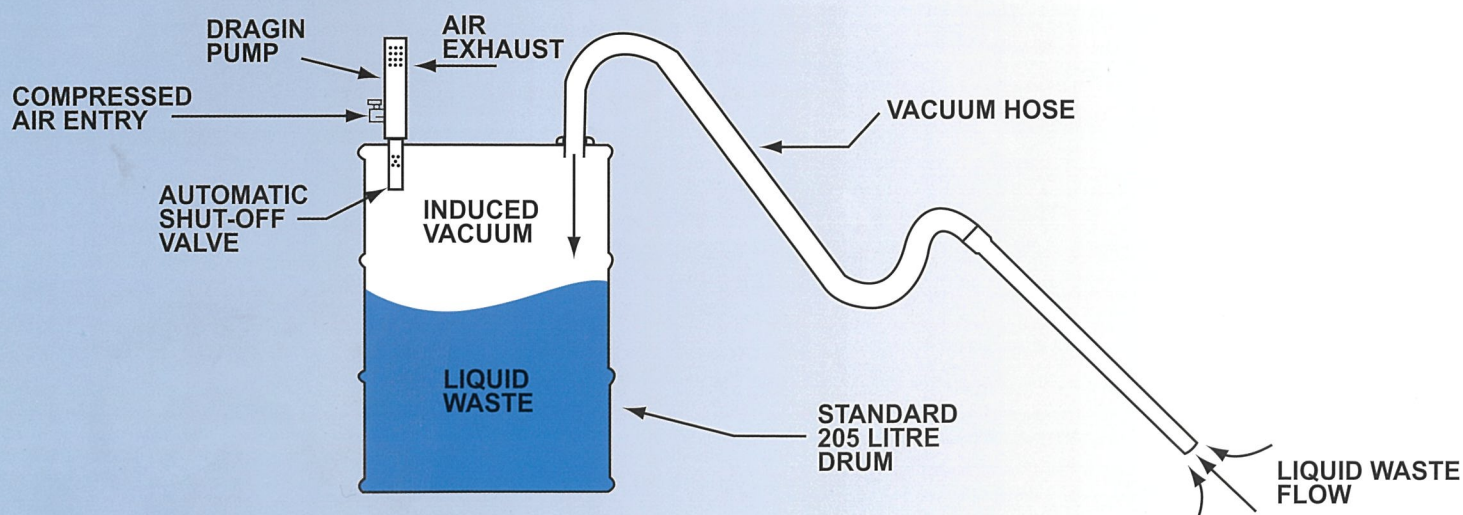

Performance Chart

INLET PRESSURE	BAR	4	5	6	7
	PSI	60	75	90	105
AIR CONSUMPTION	L/SEC	5.8	7.2	8.2	9.4
	CFM	12.3	15.2	17.4	20.0
VACUUM	MBAR	165	200	240	280
	INCH HG	5	6	7	8
FLOW RATE WATER	L/MIN	60	80	90	95
FLOW RATE OIL (SAE30)	L/MIN	45	60	67	70

The Dragin Pump Kit includes

- Dragin Pump
- Compressed air on/off valve
- Safety shut-off valve
- 2 metres of 40mm suction hose
- Rigid plastic extension wand
- Vacuum head
- Crevice vacuum tool
