## VNP180-2

The VNP180 economy vacuum offers true value. Incorporating the high performance Twinflo, two-stage, single speed vacuum turbine together with our high efficiency suction system, plays an important part in raising the Eco performance levels, whilst the HepaFlo filtration concept ensures the highest operational standards combined with clean and convenient emptying when full.

The carry handle has been specially designed to accommodate the wand system on top so that the user can carry the machine, hose and wand all in one hand leaving the other hand free to open doors or carry other items. The VNP180-2 is fitted with the unique cable tidy and plugged mains cable system, extending cable life, adding user convenience and allowing for simple cable replacements without the need of an electrical technician. The Numatic Microtex filter can be added to the VNP180-2 to boost the filtration to even higher levels for health critical applications or around those with respiratory allergies.

Model	Motor	Power	Airflow	Suction	Capacity	Range	Weight	Dimensions
VNP180-2	1000w	230V	42 L/sec	2500mm	8L	26.8m	5.9Kgs	340x 340 x 340mm
